LOCAL SOLUTIONS, GLOBAL IMPACT:

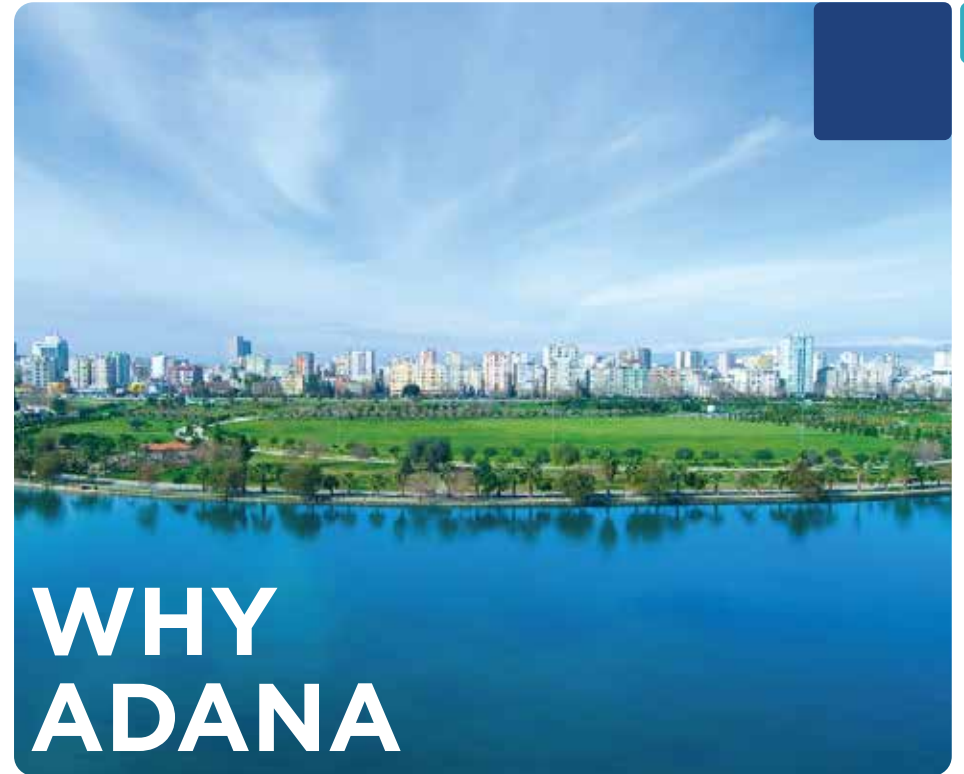

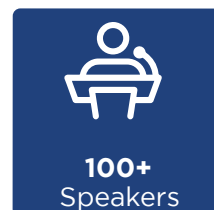

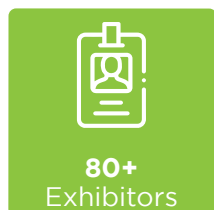

REWA ANATOLIA ADANA

REWA Anatolia, the epicenter of the ecological transition ecosystem, serves as the pivotal meeting ground for industry leaders, stakeholders, policymakers, thought influencers, and local authorities. It systematically converges the fundamental elements that define the region's environmental policy development strategies.

The REWA Anatolia Fair is organized by Solis Renewable Hub with the generous support of the Adana Municipality, the Adana Governorship, the Adana Chamber of Industry, the Adana Chamber of Commerce and the Adana Organized Industrial Zone, in cooperation with Çukurova Municipalities Union and Çukurova Technocity. As the foremost international event in the Mediterranean and Adana region, REWA Anatolia showcases cutting-edge technologies, services, and industrial solutions within the green and circular economy sectors. It acts as a dynamic hub for research and innovation, featuring leading companies specializing in environmental services, solutions, and technologies, spanning water management, waste disposal, textiles, bioenergy, soil management and protection, transport, agriculture, and sustainable urban development.

In 2024, the REWA Anatolia Fair will take place in **Tüyap Adana** from **February 15th to February 17th**. Throughout the year, we will also facilitate digital and in-person meetings, providing invaluable opportunities to address critical topics related to the adoption of circular economy principles in vital industrial supply chains and efforts towards the restoration and ecological rejuvenation of soils, hydrosphere, coastlines, and urban areas.

Together, we are united in our commitment to fostering sustainable practices and addressing the ongoing battle against climate change.

At Rewa Anatolia, we believe that positive change begins at home. **That's why we've chosen Adana, a city known for its warmth, resilience, and determination, to host this transformative event.** Our mission is clear: to unite our community, empower local businesses, and ignite a sustainable revolution right here in Adana.

In rapidly developing regions around the Mediterranean and its surroundings, apart from Istanbul and Ankara, where there is significant industrial and commercial growth, the issue of waste management is being brought to the forefront of the agenda. **To achieve these goals, we will host the REWA Anatolia Fair and Conference in Adana, which is located in the Mediterranean Region, and known for its highly fertile lands.**

WHO ATTENDS?

Successful exhibiting is all about getting in front of your ideal audience: people who will buy or specify your products and services, with a budget to spend and a need for solutions.

At REWA Anatolia, we anticipate the participation of over 5,500 industry peers, buyers, and key decision-makers who are eager to explore your exhibition. Moreover, we've established partnerships with leading industry associations, extending special benefits to their members who attend. We have set high aspirations regarding our C-Suite attendees and have curated specialized content and event programs to make sure they view this as a significant addition to their schedules.

VISITOR PROFILE

- Advertising Sector
- Agriculture and Stockbreeding Industries
- Automotive Industry
- Banking
- Cable Industry

REWA ANATOLIA 2024 THEMES

Join us and global executives as we launch our REWA Anatolia Summit on February 15th and 17th. This summit will delve into the latest innovations and transformations around waste and resource management, smart disposal and recycling strategies, waste recovery, e-waste treatment, reuse of materials, as well as integration of circularity in various industries.

This event will bring together top industry experts to discuss practical case studies, best practices, and challenging examples of waste management operations, resource economy strategies, smart technologies applications, and more. Leading professionals from global brands will be in attendance to share their experiences and discuss the best approaches in waste, utilization, and resource management practices.
